We use premium quality, natural gum rubber to vulcanize your deeply etched stamps.

Volume discounts:

If you have more than one single design setup on file, you can combine orders and/or mounting options to increase your total volume discount. This discount applies to total single stamp designs only and does not add to collections ordered with singles.

Note: Rubber Stamps on Cling Cushion Mounting Foam - SQUARE CUT (optional)

Our StampersBest Cling Cushion is 1/8" thick, high density, gray mounting foam attached to the unmounted rubber. The static cling surface works with any acrylic blocks. Square Cut means the rubber stamp and mounting cushion are cut together into neat rectangle/squares leaving a small margin around the design.
