

Graphics Editing Price List

Line art conversion, Re-sizing and Collection layouts from singles

{ SUBMITTING YOUR ARTWORK }

Files Formats:

The best file format is:

600 dpi .tif (with LZW compression for PC)

We also work with: 300 dpi: jpg, and .bmp files

Your file should be sized at your intended stamp image size to avoid graphics editing charges.

Sizing:

Please advise each intended size(s) in inches when submitting your single design(s).

No graphics editing charges apply if you are submitting black and white line art for your stamp designs that are sized and ready for rubber stamp production.

Margins:

0.25" margin required for all size Collections. This margin also applies when you have more than 1 design and order from the SINGLES price list.

Spacing for Collections:

Recommended spacing in between designs is 0.25" to 0.38"

{ GRAPHICS EDITING SERVICES }

Graphics editing charges only apply if you need our help correctly formatting your design files. All of the charges are flat rate, not hourly.

Line Art Conversion - \$50.00 each

Have us convert your grayscale images, color artwork, or photographs into high resolution one bit stamp line art. You maintain the copyrights and will receive a copy of the high resolution image file to use for any other applications or products.

Artwork Collection Layout - \$50.00 each collection

This is when you have us create a collection from your single images.

Our graphics editing department can arrange your collection layout from single design image files. We will include the needed margins and spacing between images.

Resizing Rubber Stamp Line Art to Your Specifications - \$20.00 each

We can either resize your stamp designs to a specific height / width or to the maximum size that fits any selected pricing category.
