

{ Rubber Stamp Image Preview } Grayscale

Our graphics editing department converts your artwork into 1 bit black and white line art.

In this example, customer requested a 2" wide stamp image. The height became 2.8", which makes this equal 6.6 total square inches (Image Square Inches is 8).

{ Printing Instructions }

Here is your stamp image preview with size dimensions (attached to an email). To get the best look at how your actual stamp image will leave an impression on paper, print the attached preview.

After you look it over, please reply (email) to approve your image. Once approved, your stamp will continue into production.

How to print .pdf documents for stamp image previews:

Adobe Reader: In the File menu after you select 'Print' be sure to set 'Page Scaling' to 'None' in order to print actual size.

Inkjet Printers: Printing on 'economy' or 'draft' setting gives you the best preview of the impression your stamp will make on plain paper.

Laser Printers: Stamp image previews tend to appear darker on laser printouts. Printing on an inkjet is recommended to get an accurate preview.
